

AirMobile Newsletter September - AirMobile release PCI DSS W-Fi automated reporting at PCI SSC in Orlando, Florida Sep 22

Stockholm, Sweden – July 27, 2010 AirMobile AB, a leading provider of mobile wireless assessment solutions, today announced that it will release PCI DSS Wi-Fi automated reporting functionality at the event.

“At the events we will show participants a live AirMobile system and how cost effective it is to use mobile clients to assess Wi-Fi security says Fredrik Robin Marketing Director at AirMobile AB. AirMobile is the industry leading Wireless assessment system using client technology to fulfill PCI requirements. This means customers such as commercial retail can use existing logistics Wi-Fi scanners and AirMobile software to cover distributed environments for a limited cost.” Our product will also help any organization who wants to automate and speed up Wi-Fi assessment scanning.”

Scanning timesheet

PCI DSS 1.2.1 requirements

- 11.1: Test for the presence of wireless access points by using a wireless analyzer at least quarterly

PCI compliance report

Welcome to AirMobile

AirMobile is a Mobile Wi-Fi Assessment System that enable Enterprises and organizations to protect networks from wireless security vulnerabilities, whether or not they deploy an own wireless network.

AirMobile solution is a scalable, secure and cost-effective solution using mobile and static sensors to scan and position Wi-Fi devices. The AirMobile server generates reports and visualizes Wi-Fi networks on maps for distributed environments.

In October 2008, the PCI (Payment Card Industry) released the PCI DSS 1.2 directives which include Wi-Fi scanning requirements. AirMobile includes automatic generation of PCI compliance reports to fulfill PCI requirements.

AirMobile can be purchased either as a monthly hosted service or as a perpetual system including AirMobile server.
